

DAILY SUMMARY
February 15, 2013

Actions in SCOUT:

External Outreach:

Organizational/Personnel:

Significant Emergency Responses:

Actions taken or Documents Issued:

Internal Coordination:

- Coordinated with Superfund regarding conditions NMED is interested in requesting in the Chevron Questa Mine permit. NMED is expressing interest in having the NPDES permit include a compliance schedule for resolving unpermitted discharges that are subject to the ongoing Superfund cleanup. (WQ)

Pending HQ Decisions:

HQ Visits:

Emerging Issues:

- Today, the Region learned the Oklahoma Corporation Commission has required a disposal well operator to run an injection reservoir test in reaction to findings by an OU professor tying the disposal well to seismic activity in central Oklahoma. The lengthy test started this week, and is based on recommendations the Region provided around February 1, at the request of OCC. (WQ)
